Professional Summary

Detail-oriented Information Technology student specializing in Data Analytics, Business Intelligence, and Data Visualization. Proficient in Python, Power BI, and Tableau with hands-on experience in end-to-end data workflows - from raw data ingestion and cleaning to interactive dashboard development and actionable insight delivery.

Education

Dhole Patil College of Engineering (SPPU)

2023 - 2027

Bachelor of Engineering in Information Engineering – pursuing

Pune, Maharashtra

Dhole Patil College of Engineering (SPPU)

2025 – 2027

Honors-Artificial Intelligence And Machine Learning – pursuing

Pune, Maharashtra

Technical Skills

- **Programming Languages:** Python, (Pandas, NumPy, Matplotlib, Seaborn)
- **Web Technologies:** HTML | Basic Web Development
- **Data Science:** Python, NumPy, Pandas, SQL, Statistics Fundamentals, Data Visualization, Machine Learning
- **Tools:** VS Code, jupyter Notebook, Power BI

Projects

Sales Performance Dashboard – Power BI

- Designed an interactive Power BI dashboard tracking KPIs (revenue, sales volume, growth rate) across regions and product categories using DAX measures and calculated columns.
- Implemented drill-through reports and dynamic slicers to enable stakeholders to self-serve insights without manual reporting.
- Applied Power Query for multi-source data transformation and model optimization, reducing report refresh time by 40%.

COVID-19 Data Trend Analysis – Python (Matplotlib / Seaborn)

- Analyzed publicly available COVID-19 dataset to visualize case trends, recovery rates, and mortality across countries using Matplotlib and Seaborn.
- Generated line charts, bar plots, and heatmaps to communicate temporal and geographic patterns clearly.
- Documented findings in a structured EDA report highlighting data quality issues and key statistical insights.

Customer Segmentation Analysis – Python & Tableau

- Performed EDA on a 10,000-row customer dataset using Pandas and NumPy to identify purchasing behavior patterns and churn indicators.
- Built K-Means clustering model to segment customers into 4 distinct groups; visualized segments with Tableau scatter plots and heat maps.
- Cleaned and pre-processed raw data (handled nulls, outliers, encoding) and produced a Tableau story presentation for stakeholder review.

Certifications & Achievements

- Power BI for Beginners to Advanced – Microsoft Power BI Desktop (In Progress)
- Tableau for Data Science & Analytics – Data Visualization with Tableau (In Progress)
- Python for Data Science and Machine Learning Bootcamp – Core EDA & Visualization
- Excel for Data Analytics – PivotTables, Charts, VLOOKUP, and Dashboard Design
